

## VMWare Airwatch: Bootcamp

Duration: 4 Days

### Overview:

This four-day boot camp is a combination of the VMware Airwatch: Configure and Manage and the VMware AirWatch: Configure and Deploy Integrated Solutions courses. These courses take you from learning the foundational skills needed to configure and manage your VMware AirWatch® environment to advanced operations on the VMware AirWatch platform. You will learn how to enable containerized applications, deploy and manage corporate email and integrate VMware AirWatch with your enterprise resources.

Product Alignment: VMware Airwatch® Enterprise Mobility Management™.

This course prepares you for the following accreditation – VMware AirWatch Associate Accreditation Enterprise Mobility, VMware AirWatch Professional Accreditation Enterprise Mobility.

### Target Audience:

VMware AirWatch administrators, IT staff, sales engineers, consultants, support and helpdesk personnel, solutions architects, solutions engineers and VMware AirWatch installers and implementation specialists.

### Module 1: Basic VMware Airwatch Architecture

### Module 2: Introduction to VMware Airwatch

### Module 3: Mobile Device Management Fundamentals

### Module 4: Mobile Email Management Fundamentals

### Module 5: Mobile Application Management Fundamentals

### Module 6: Mobile Content Management Fundamentals

### Module 7: Next steps

### Module 8: Enterprise Systems Connector

### Module 9: Integrate and Configure with Directory Services

### Module 10: Secure Mobile Devices with Certificates

### Module 11: Unified Access Gateway

### Module 12: AirWatch Secure Email Gateway

### Module 13: Windows PowerShell Configuration

### Module 14: Integrating with Android Enterprise

### Module 15: Enrollment Options for MDM

### Module 16: Create Web, Application and Device Kiosks

### Module 17: Reports, Analytics and Telecom Management

### Module 18: VMware Identity Manager

### Module 19: AppConfig Community

### Module 20: AirWatch Content Locker Advanced

## Course Completion:

At course completion, students will be able to:

- Enroll devices in your enterprise environment, configure and update device settings over the air, and secure a diverse fleet of mobile devices
- Select the email deployment strategy that best fits your business and security requirements
- Manage internal, public and purchased applications across managed devices
- Enable secure mobile access to content anytime, anywhere, while protecting sensitive content
- Gain insight into major platforms, including iOS, Android, and Windows 10 devices
- Configure and provision cloud deployments
- Learn VMware AirWatch best practices for mobile deployments
- Understand how to deploy and manage VMware AirWatch application from the console
- Integrate with enterprise resources by installing VMware Enterprise Systems Connector™
- Enable containerized applications to securely connect with back-end resources through use of VMware Unified Access Gateway™
- Deploy and manage corporate email through the use of VMware AirWatch® Secure Email Gateway™

## Module 21: Next Steps
