

VMware Airwatch: Configure & Deploy Integrated Solutions

Duration: 2 Days

Overview:

This two-day course will provide you with the skills required to configure and provision VMware AirWatch® cloud deployments. It will cover the enablement of containerized applications, deployment and management of corporate email, and integration with enterprise resources. You will access hands-on labs and learn best practices for mobile deployment, with a focus on how to deploy and manage VMware AirWatch applications. Students who complete this course and pass the accreditation exam may enrol in the VMware AirWatch: Install and Deploy On-Premise Solutions course. This course prepares you for the following accreditation: VMware AirWatch Professional Accreditation: Enterprise Mobility.

Target Audience:

VMware AirWatch administrators, IT staff, sales engineers, consultants, support and helpdesk personnel, solutions architects, solutions engineers and VMware AirWatch installers and implementation specialists.

Pre-requisites:

Before attending this course, students must have completed:

- VMware AirWatch: Configure and Manage

Module 1: Enterprise Systems Connector

Module 2: Integrate and Configure with Directory Services

Module 3: Secure Mobile Devices with Certificates

Module 4: Unified Access Gateway

Module 5: AirWatch Secure Email Gateway

Module 6: Windows PowerShell Configuration

Module 7: Integrating with Android Enterprise

Module 8: Enrollment Options for Mobile Device Management

Module 9: Create Web, Application and Device Kiosks

Module 10: Reports, Analytics, and Telecom Management

Module 11: VMware Identity Manager Overview

Module 12: AppConfig Community

Module 13: AirWatch Content Locker Advanced

Module 14: Next Steps

Course Completion:

At course completion, students will be able to:

- Configure and provision cloud deployments
- Learn VMware AirWatch best practices for mobile deployments
- Integrate with enterprise resources by installing VMware Enterprise Systems Connector™
- Enable containerized applications to securely connect with back end resources through use of VMware Unified Access Gateway™
- Deploy and manage corporate email through integration with Windows PowerShell or through the use of AirWatch® Secure Email Gateway™
