VMWare Airwatch: Configure and Manage

Duration: **2 Days**

Overview:

This two-day course provides insight into the current challenges of enterprise mobility and how VMware AirWatch® can help you solve those challenges. You will gain a comprehensive view of all VMware AirWatch® Enterprise Mobility Management™ solutions and key device platforms, as well as an overview of VMware AirWatch architecture. This course provides the foundational skills necessary to manage the VMware AirWatch platform. Product Alignment: VMware AirWatch Enterprise Mobility Management

Target Audience:

VMware AirWatch administrators, IT staff, sales engineers, consultants, support and helpdesk personnel, solutions architects, solutions engineers, and VMware AirWatch installers and implementation specialists

Course Completion:

At course completion, students will be able to:

- Enroll devices in your enterprise environment, configure and update device settings over the air, and secure a diverse fleet of mobile devices
- Select the email deployment strategy that best fits your business and security requirements
- Manage internal, public, and purchased applications across managed devices
- Enable secure mobile access to content anytime, anywhere, while protecting sensitive content
- Gain insight into major platforms, including iOS, Android, and windows 10
