## VMWare Airwatch: Install & Deploy On-Premise Solutions

Duration: **1 Day**

### Overview:

This one-day course is designed to equip you with the skills to install, configure, and upgrade an on-premise VMware AirWatch® server. You will have access to hands-on labs and learn upgrade options and strategies, as well as how to troubleshoot common installation and upgrade problems. Advanced installation techniques are discussed, including the use of high availability and redundancy.
Product Alignment: VMware AirWatch® Enterprise Mobility Management™
This course prepares you for the following accreditation: VMware AirWatch Expert Accreditation: Enterprise Mobility.

### Target Audience:

VMware AirWatch administrators, IT staff, sales engineers, consultants, support and helpdesk personnel, solutions architects, solutions engineers and VMware AirWatch installers and implementation specialists.

### Pre-requisites:

Before attending this course, students must have:

- VMware AirWatch: Configure and Deploy Integrated Solutions
- One of the following certifications is required: VMware AirWatch Professional Accreditation: Enterprise Mobility
- AirWatch Technical post-sales cloud professional

### Module 1: Advanced AirWatch Architecture

### Module 2: Prepare for Installation

### Module 3: Install the AirWatch Applications

### Module 4: Install Reports

### Module 5: Perform Post-Installation Configuration and Verification

### Module 6: High Availability and Disaster Recovery Configuration

### Module 7: Prepare an Environment for an Upgrade

### Module 8: Perform an Upgrade

### Module 9: Complete Post-Upgrade Environment Verification

### Module 10: Troubleshoot Common Issues

## Course Completion:

After completing this course students will be able to:

- Identify important installation and upgrade prerequisites
- Learn to install, configure, and upgrade an on-premise VMware AirWatch server
- Discuss the benefits of using advanced installation techniques, including the use of high availability and enabling redundancy through multiserver configurations
- Review and recommend appropriate upgrade options and strategies
- Troubleshoot common installation and upgrade problems
