VMWare Airwatch: Integrating with VMware Identity Manager

Duration: **1 Day**

Overview:

This one-day course focuses on the basic skills that you need to effectively implement VMware Identity Manager™. The course includes a hands-on component in which you will install and implement an instance of VMware Identity Manager. You will gain skills to effectively integrate this tool with your VMware AirWatch® environment.
Product Alignment: AirWatch® Enterprise Mobility Management™, VMware Workspace™ ONE™

Target Audience:

VMware AirWatch administrators, solutions architects, solutions engineers, sales engineers, consultants, installers and implementation specialists

Course Completion:

At course completion, students will be able to:

- Explain the security benefits of using the solution
- Install a cloud or on-premises instance of VMware Identity Manager
- Integrate VMware Identity Manager with your instance if VMware AirWatch
- Troubleshoot common installation roadblocks

Module 1: VMware Identity Manager Fundamentals

Module 2: Prepare for Installation

Module 3: Install VMware Identity Manager

Module 4: Perform Post Installation Configuration and Verification

Module 5: VMware Identity Manager Connector

Module 6: Troubleshooting
